

**All our 2017 sales will be through the internet, we will not send out a catalog**

**TERMS OF ORDERING For 2017**

**MINIMUM ORDER is \$17.99 not including shipping**

This year we will be shipping some of our slips in the old traditional style by pulling and leaving some of the roots intact. Short slips will be sent intact, longer slips will be cut back. We will also use the newer and accepted practice adopted by universities and large commercial growers by supplying “cuts”. This is where the slips are cut off at soil level and shipped **without roots** and some of the leaves also removed. It adds an extra layer of disease control and gets the slips into a more desired size for shipping and reduces stress. They are also packed rather dry, so will be wilted and possibly yellowed. The cuts will root very fast after being planted and kept moist/wet for a few days. Some of them might look like they are inches from death to the unknowledgeable gardener when they arrive, but will spring back to life faster. All they need is a healthy stem. Eventually we will move entirely to cuts.

**If you have a question, please email us. DuckCreekFarms@aol.com. If you don't hear back in a reasonable time, please email again. We had problems getting all orders with our server last year and are changing to a faster and better internet service. Hopefully this will elevate “missed” orders this year. We can't answer phone calls or take phone orders. Thanks for understanding.**

**MINIMUM ORDER is \$17.99 not including shipping,**

**Shipping Dates for 2017**

Shipping is \$12.50 per order for 2017.

Please do not request a shipment date until your soil temperatures are consistently in the 60's for an extended period. Your state cooperative extension service can provide those dates. This is typically about 4 weeks after your average frost free date. And definitely when the night time lows are in the 60's for an extended amount of time

Due to the ongoing **colder than normal** Springs we have been experiencing the past few years, we are delaying shipping a week for 2017 expecting the “New Normal” trend to continue.

Shipping to Zones 7, and above should start around the week of **May 15, 2017** depending on how good the sweet potatoes are slipping.

Shipping to Zones 6 and below (or anywhere north of Oklahoma) should begin the weeks of **May 22, 2017 or June 1**

Our last shipping will be the week Of June 19, 2017. We typically plant our stock after the bulk of the shipping season is over.

**We have indicated some of the Varieties that are sometimes slow slippers, so if you order those varieties, don't expect early shipment. EARLY IS ANYTIME IN MAY. PLEASE, if you must have your slips earlier, and can not take a delay in shipments, please order from someone that can guarantee earlier shipment. We appreciate your business, but we want you to be happy.**

**We ship USPS Priority Mail. It comes with automatic \$50.00 insurance. If you have problems and need to file a claim consult your Post Master. Most packages arrive in 2 to 3 days. Our Plant Guarantee is that we will send the best slips possible, but will not be liable for damages other than the cost of the slips.**

**By placing an order with Duck Creek Farms, you acknowledge that you have read and agree to our terms**

**Please check one of the following boxes for your order**

**We usually ship on Mondays, Tuesdays and Wednesdays for out of state, Thursdays for instate (OK) orders and sometimes Fridays for Monday delivery anywhere. You can check more than one box if more than one date is OK.**

**Ship ASAP** meaning that we will ship your order when we have the slips you want ready, not meaning it will be shipped tomorrow or earlier than May  
Only check this box if you are in zone 7 and above

Ship Week of May 15, our first official shipping week for 2017

Ship Week of May 22nd  
Just about all varieties are "Usually" ready by this date, baring a crop Failure on some of the extremely slow to slip varieties.

Ship Week of May 29th

Ship Week of June 5th

Ship Week of June 12th

Ship Week of June 19th

**Please check one of the following boxes for your order**

If your order is not all ready on your specified ship date may we

Substitute for another variety (we are usually generous on subs)

Delay shipping a week or two until they become ready

Send refund on unavailable varieties and ship what's ready

Some of the dependable slippers year in and year out are:

Bradshaw, Carolina Nugget, Beauregard (a bit slow but dependable), Razorback, Bugtussle, Ginseng Orange, Envy, Dianne, Becca's Purple, Purple Delight, Molokai Purple, Georgia Jet, Hernandez,

**Top Selling Varieties**

8633, Allgold, Barberman, Beauregard, Becca's Purple, Bradshaw, Carolina Nugget, Cordner's Red, Dianne, Georgia Jet, Ginseng Orange, Hernandez, Jewel, Korean Purple, Molokai Purple, Purple Delight, Redmar, Red Wine Velvet. Violetta,

**163 varieties listed**

**8633**

(Quantity 1000)

Early Production, Red/orange skin, deep orange flesh. vigorous growing, compact plants, great producer of large, fat, sweet potatoes, sweet orange flesh. An excellent variety. Pox and nematode resistant. Leaves and vine tips are edible too, used much like cooked spinach. Slow and shy slip producer so don't expect early shipment.

<b>12 for \$8.99 ..</b>

**Carolina Rose**

Very similar to Carolina Ruby with dark rose-red skin and orange flesh. Excellent yields with early to mid season maturity.

**Notify me when Carolina Rose is added back to stock**

**Carolina Ruby** (North Carolina 1999) (Qty 500)

Favorable with Beauregard and was superior to Jewel in University trials. Yield similar to Beauregard for the U.S. #1 and canner grades and slightly higher for jumbo grades. Harvest dates typically 3-5 days earlier than Beauregard. Roots store well without excessive weight loss from storage rots or dehydration. Baked roots have uniform color, and moist smooth flesh, and good flavor. A finicky sprouter so don't expect early shipment.

<b>Buy It Now X</b>

**3 for \$3.99 . .**

**6 for \$5.99 ..**

**Chinese Empress** (0.4)

Spreading vines, yellow to light orange skin with a pinkish hue, light orange flesh, roots can get quite large. High Production. Very popular in China where it originated.

**Notify me when Chinese Empress is added back to stock**

**Continental Red:** (Heirloom from Missouri)

Early production with good yields. Semi-bush, Ivy leaf, pink-red skin, light orange flesh,

**Notify me when Continental Red is added back to stock**

**Cook's Family Heirloom** (Kansas/Missouri Heirloom)

Rosy, copper skin, orange flesh. Very Productive, reported to have some tendency to crack in dry years, but we didn't experience any in 2013 which was extremely dry. This variety was grown by the Cook family since 1920 or earlier, in Missouri and Kansas.

The roots spread out and go a bit deeper, so dig with care.

**Notify me when Cook's is added back to stock**

**Cordner:** (Oklahoma/Texas 1983)

Early to Mid season production Spreading growth with orange skin and flesh.

Developed in Oklahoma by Dr H B Cordner and released by Texas in 1983. Good yields.

**Notify me when Cordner is added back to stock**

**Cordner's Red** (Oklahoma heirloom 1950's)

(Quantity 1500)

This is a very compact bush type plant with red skin and orange moist flesh. Excellent for people with smaller gardens. The name "Cordner's Red" was given by local growers as it was never officially released. From the breeding material of Dr. H. B. Cordner of Oklahoma. Fair storage variety and great tasting. A personal favorite. One of our top producers in 2013. Early production

## Laceleaf

(Heirloom) Early production. Semi-bush, Ivy leaf, pink skin, pale orange flesh, excellent yields.

**Notify me when Laceleaf is added back to stock**

**Liberty** (South Carolina 1993)

Liberty is a Boniato-type sweetpotato that exhibits multiple resistances to insects and nematodes. These resistances and its attractive storage roots with a scarlet skin color and cream flesh color make Liberty a desirable cultivar for markets that prefer a dry, mild-flavored sweetpotato. This cultivar is also suitable for organic growers and home gardeners.

**Notify me when Liberty is added back to stock**

**Mahan / Bradshaw** (heirloom)

(Quantity 2000)

Mahan was renamed Bradshaw in 2010, Heirloom variety High production and excellent storage. Very sweet, Moist, Orange Flesh. Ivy leaves with semi compact vines. Looks very similar to Continental Red. This is probably the same as Carolina Nugget.

## Oklamar (Oklahoma 1957)

Tanish-salmon skin with sweet, moist, light orange colored flesh. Good yields

**Notify me when Oklamar is added back to stock**

## Okinawa Purple

(Quantity 1500)

Light beige skin, purple flesh. Flesh gets darker and deeper purple when cooked. They are surprisingly sweet when cooked. Pretty foliage plant as well. Slow grower. Needs a VERY long, hot growing season. Preferably 140 days or longer. Originally from Japan...They will form roots out away from the center of the plant... **Attention:** we only recommend these for trial, as they are not high production and need a very long season and not adapted to all of the US especially the north. The dark purple only develops in rich soil. **For 2017 we will only be shipping unrooted cuttings.**
