

**All our 2018 sales will be through the internet, we will not send out a catalog**

**TERMS OF ORDERING For 2018**

**MINIMUM ORDER is \$17.99 not including shipping**

This year we will be shipping some of our slips in the old traditional style by pulling and leaving some of the roots intact. Short slips will be sent intact, longer slips will be cut back. We will also use the newer and accepted practice adopted by universities and large commercial growers by supplying “cuts”. This is where the slips are cut off at soil level and shipped **without roots** and some of the leaves also removed. It adds an extra layer of disease control and gets the slips into a more desired size for shipping and reduces stress. They are also packed rather dry, so will be wilted and possibly yellowed. The cuts will root very fast after being planted and kept moist/wet for a few days. Some of them might look like they are inches from death to the unknowledgeable gardener when they arrive, but will spring back to life faster. All they need is a healthy stem. Eventually we will move entirely to cuts.

**If you have a question, please email us. DuckCreekFarms@aol.com. If you don't hear back in a reasonable time, please email again. We had problems getting all orders with our server last year and are changing to a faster and better internet service. Hopefully this will elevate “missed” orders this year. We can't answer phone calls or take phone orders. Thanks for understanding.**

**MINIMUM ORDER is \$17.99 not including shipping,**

**Shipping Dates for 2018**

**Shipping is \$12.50 per order for 2018.**

**Please do not request a shipment date until your soil temperatures are consistently in the 60's for an extended period. Your state cooperative extension service can provide those dates. This is typically about 4 weeks after your average frost free date. And definitely when the night time lows are in the 60's for an extended amount of time**

**Due to the ongoing colder than normal Springs we have been experiencing the past few years, we are delaying shipping a week for 2018 expecting the “New Normal” trend to continue.**

**Shipping to Zones 7, and above should start around the week of May 13, 2018 depending on how good the sweet potatoes are slipping. Slow to slip varieties might take longer**

**Shipping to Zones 6 and below (or anywhere north of Oklahoma) should begin the weeks of May 27, 2018 or June 3**

**Our last shipping will be the week Of June 17, 2018. We typically plant our stock after the bulk of the shipping season is over.**

**We ship Monday, Tuesday, Wednesday and Thursday for instate addresses**

**We have indicated some of the Varieties that are sometimes slow slippers, so if you order those varieties, don't expect early shipment. EARLY IS ANYTIME IN MAY. PLEASE, if you must have your slips earlier, and cannot take a delay in shipments, please order from someone that can guarantee earlier shipment. We appreciate your business, but we want you to be happy. We Plant ours up until mid July, so don't get in a rush.....**

**We ship USPS Priority Mail. It comes with automatic \$50.00 insurance. If you have problems and need to file a claim consult your Post Master. Most packages should arrive in 2 to 3 days. Some areas of the US have very inefficient postal service and might take longer. Our Plant Guarantee is that we will send the best slips possible, but will not be liable for damages other than the cost of the slips.**

**By placing an order with Duck Creek Farms, you acknowledge that you have read and agree to our terms**

**Please check one of the following boxes for your order**

**We usually ship on Mondays, Tuesdays and Wednesdays for out of state, Thursdays for instate (OK) orders and sometimes Fridays for Monday delivery anywhere. You can check more than one box if more than one date is OK.**

**Ship ASAP** meaning that we will ship your order when we have the slips you want ready, not meaning it will be shipped tomorrow or earlier than May  
Only check this box if you are in zone 7 and above

Ship Week of May 13, our first official shipping week for 2018

Ship Week of May 20nd  
Just about all varieties are "Usually" ready by this date, baring a crop  
Failure on some of the extremely slow to slip varieties.

Ship Week of May 27th

Ship Week of June 3rd

Ship Week of June 10th

Ship Week of June 17th

**Please check one of the following boxes for your order**

If your order is not all ready on your specified ship date may we

Substitute for another variety (we are usually generous on subs)

Delay shipping a week or two until they become ready

Send refund on unavailable varieties and ship what's ready

**Please Note that we have a poor crop in 2017 due to the weather and many varieties will be in very short supply.**

Some of the dependable slippers year in and year out are:

Bradshaw, Carolina Nugget, Beauregard (a bit slow but dependable), Razorback, Bugtussle, Ginseng Orange, Envy, Dianne, Becca's Purple, Purple Delight, Molokai Purple, Georgia Jet, Hernandez,

**Top Selling Varieties**

8633, Allgold, Barberman, Beauregard, Becca's Purple, Bradshaw, Carolina Nugget, Corder's Red, Dianne, Georgia Jet, Ginseng Orange, Hernandez, Jewel, Korean Purple, Molokai Purple, Purple Delight, Redmar, Red Wine Velvet, Violetta,

### **8633**

Early Production, Red/orange skin, deep orange flesh. vigorous growing, compact plants, great producer of large, fat, sweet potatoes, sweet orange flesh. An excellent variety. Pox and nematode resistant. Leaves and vine tips are edible too, used much like cooked spinach. **Slow and shy slip producer so don't expect early shipment.**

<b>Buy It Now</b>	<b>X</b>
<b>3 for \$3.99</b>	.
<b>6 for \$5.99</b>	.
<b>12 for \$8.99</b>	.

### **Allgold** (Oklahoma 1953)

Early production. Vigorous spreading vines, tan-yellow skin with pale orange flesh, heavy yields. Equal if not superior to Porto Rico in taste and table appearance and contains 50% more vitamin C and more than 3 times as much vitamin A. Developed by Dr. Cordner, Oklahoma A & M College. Don't expect uniform roots, as some will be long and skinny and even crooked depending on your soil type.

**Not available for 2018**

### **Asian Greens Variety**

We received this variety from an Asian grower that grew them for greens. Grown for the vines which are very good cooked liked spinach. Don't expect a root crop on these, but if you do get some roots, they will be white skin and flesh.

<b>3 for \$3.99</b>	.
<b>6 for \$5.99</b>	.
<b>12 for \$8.99..</b>	.
<b>25 for \$17.99..</b>	.

### **Barberman** (Heirloom)

Early production. Spreading growth habit, regular leaf, light orange skin, orange flesh, and excellent yields. Short blocky roots grow directly under the plant for easy digging. Very long storage life. Highly recommended. **Very Limited for 2018. This was a slow slip producer in 2017 so don't expect early shipment.**

<b>Buy It Now</b>	<b>X</b>
<b>3 for \$3.99</b>	.
<b>6 for \$5.99</b>	.
<b>12 for \$8.99</b>	.

**Beauregard** (Louisiana 1987)

Red-Orange skin, orange flesh. Thin stalks, vigorous grower, good producer, fat & heavy sweet potatoes. A typical "yam" type you find in stores. Has pox and nematode resistance. Very dependable producer with a very loyal following. Early production.

For larger quantities, see wholesale section

12 for	\$8.99 ..

**Bugtussle** (Heirloom from Kentucky) **Limited for 2018**

This sweetpotato is reported to have been grown in the Bugtussle, KY area for over 100 years. Yellow flesh, pinkish skin. . Very high yields with early to mid season production. Beautiful Ivy shaped leaves and very spreading growth habit. Cooks up somewhat dry, but sweet. Gopher got our crop this year, but should still have plenty to meet demand.

**Buy It Now X**

**3 for \$3.99 . .**

**6 for \$5.99 ..**

**12 for \$8.99 ..**

**Bunch Porto Rico**

Mid-season. Regular leaf, yellow-orange skin and flesh. Needs long season to do well. Bush type, great for smaller gardens.

For larger quantities, see wholesale section

**Buy It Now X**

**3 for \$3.99 . .**

**6 for \$5.99 ..**

**12 for \$8.99 ..**

**Carolina Nugget** (North Carolina 1954) **Not available in the retail section for 2018**

Roots short, blocky with rosy skin. Flesh medium orange. Roots have good table quality. Leaves deeply cut, dark green with a purplish tinge. Increased yields and superior root shape in heavy soils. Some resistance to fusarium wilt and southern root knot. **For larger quantities, see wholesale section**

**Carolina Ruby** (North Carolina 1999)

Favorable with Beauregard and was superior to Jewel in University trials. Yield similar to Beauregard for the U.S. #1 and canner grades and slightly higher for jumbo grades. Harvest dates typically 3-5 days earlier than Beauregard. Roots store well without excessive weight loss from storage rots or dehydration. Baked roots have uniform color, and moist smooth flesh, and good flavor. **A finicky sprouter so don't expect early shipment.**

**Buy It Now X**

**3 for \$3.99 . .**

**6 for \$5.99 ..**

**12 for \$8.99 ..**

**Chesapeake** ( MD-253 )

Orange skin and flesh. Early production with good yields.

**Check back for availability and pricing**

**Cordner's Red** (Oklahoma heirloom 1950's)

This is a very compact bush type plant with red skin and orange moist flesh. Excellent for people with smaller gardens. The name "Cordner's Red" was given by local growers as it was never officially released. From the breeding material of Dr. H. B. Cordner of Oklahoma. Fair storage variety and great tasting. A personal favorite. One of our top producers in 2013. Early production. **Can be slow to slip some years.**

<b>Buy It Now X</b>
<b>3 for \$3.99 . .</b>
<b>6 for \$5.99 ..</b>
<b>12 for \$8.99 ..</b>

**D & S Red**

Vining type with dark red skin and orange flesh. Looks very similar to Garnet except has regular leaves. Used in California to make Spirits.

<b>Buy It Now X</b>
<b>3 for \$3.99 . .</b>

## **Georgia Jet**

Root shape short spindle. Skin color purple-red. Flesh light orange. Can grow rather large roots with long season. Earliness 90 days under good conditions. Storage satisfactory. Good to excellent baking tests. This variety is prone to cracking in dry conditions, but we have not experienced much cracking the past few years. It remains a very popular variety. Cooks up soft and sweet. One of our best producers for 2013 and even better in 2014. Our Clone will bloom.

<b>Buy It Now</b>	<b>X</b>

<b>6 for \$5.99</b>	<b>..</b>
<b>12 for \$8.99</b>	<b>..</b>
<b>25 for \$17.99</b>	<b>..</b>

## **Georgia Red** (Georgia 1955)

Georgia Red is a selection from a cross of Porto Rico. It has a reddish/copper skin and orange flesh with a soft/moist texture. Excellent keeping and eating quality. While we try and select the reddest color skinned roots for our seed stock, the color will vary from reddish to copper-tan. Excels as a baking potato. It's a mid to late season variety and will need about 120 days to mature. Expect Average Yields, though it was one of our biggest producers in 2011

**Check Back for availability and pricing**

## **Golden Slipper** (Heirloom Variety) **not available for 2018**

Mid-season. Vining, regular leaf, orange skin, orange flesh, good production.

## **Golden Sweet** **Not available for 2018**

Beige skin, light yellow flesh. Very vigorous, a quick growing and high producer of heavy-set typically shaped sweet potatoes. Great tasting white-type variety. Mid-season

## **Grand Asia**

Early to Mid-season maturity, purple skin with white flesh. High Production

<b>Buy It Now</b>	<b>X</b>

Cream/white skin and flesh. Average Yield, mid season

**Check back for availability and pricing**

**Hayman**

(Heirloom Variety) Mid-season. Vining, Regular leaf, cream colored skin, cream flesh, average yield, but flavor is good. Very popular on the East Coast. Roots tend to stay small.

<b>Buy It Now</b>	<b>X</b>
<b>3 for \$3.99 .</b>	.
<b>6 for \$5.99 ..</b>	..
<b>12 for \$8.99 ..</b>	..

**Hatteras** (North Carolina)    **Not available for 2018**

An orange-fleshed, smooth-skinned, rose colored, table stock sweetpotato. The leaves are typically green and triangular shaped, and the vines produce a dense canopy that competes well against weeds. Hatteras normally produces uniform shaped roots high yields are normally harvested in 100-110 days. Slow to sprout, don't expect early shipment

**Hernandez** (Louisiana 1990)

Mid-season Vigorous vines, orange skin, dark orange flesh. Very moist when cooked, above average yields. This was one of our best producers in 2010.

For larger quantities, see wholesale section

<b>Buy It Now</b>	<b>X</b>
<b>3 for \$3.99 .</b>	.

<b>12 for \$8.99 ..</b>	..

**Hopi** (New Mexico) **new for 2018**

Plants have trailing growth habit with a tendency to produce semi-erect branches near hills. Vines purple. Leaves medium- sized, dark green with purple overcast. Root skins light copper to salmon. Flesh medium orange-salmon. Carotene content moderate. Roots fusiform-to-tapered. Suitable for early fresh market. Looks, packs and keeps good, even when freshly harvested. More tolerant to fusarium wilt than Kandee. Resistant to root-knot nematode damage and cracking. Appears to be field resistant to black rot. Excellent baking and eating qualities. Not suitable for canning. High production in 2017, when others failed.

## **Okinawa Purple**

Light beige skin, purple flesh. Flesh gets darker and deeper purple when cooked. They are surprisingly sweet when cooked. Pretty foliage plant as well. Slow grower. Needs a VERY long, hot growing season. Preferably 140 days or longer. Originally from Japan...They will form roots out away from the center of the plant... **Attention:** we only recommend these for trial, as they are not high production and need a very long season and not adapted to all of the US especially the north. However, are getting very exciting reports from some of our customers that are have good success with our clone. The dark purple only develops in rich soil. **For 2018 we will only be shipping unrooted cuttings.**

<b>Buy It Now X</b>

### **Red Wine Velvet** (Heirloom type)

Mid-season. Average vines, deep red skin, Very smooth, sweet, moist, orange flesh, and average yield, but has the potential for very high yields under good growing conditions. A very popular variety that usually sells out fast. **Slow to sprout so don't expect early shipment.** Flowers late.

**Check back for availability and pricing**

### **Ruddy**

**Not available for 2018**

pink/red skin, orange flesh, 110-120 days to maturity

Released by the USDA, Agr. Res. Serv., U.S. Vegetable Lab. and South Carolina Agr. Expt. Sta. in 1999 Parentage: open pollinated seedling of W-119. Characteristics: light red/pink skin and orange flesh, roots fusiform and uniformly shaped, dense leaf canopy. Resistance: Fusarium wilt and southern root-knot nematode.

### **Scarlet** (North Carolina 1982) **Not available for 2018**

Scarlet is a Red Skin Jewel. Early to mid season maturity vining growth habit. Roots tend to be more cylindrical and slightly longer than Jewel roots. Skin red. Flesh orange. Roots remain sound in storage for 7 or more months. Reported to be judged superior to Jewel in baking trails.

**Shoregold** (Virginia 1987)

Early, widely adapted, high yielding. Excellent baking quality. Roots uniformly fusiform to blocky. Skin light copper, smooth. Internal root color bright orange. Stores well. Well-suited for baking and canning. High yields. Semi-bush habit
